DataPath

Billing Solutions

BLAZE A PATH TO NEW FRONTIERS

No Boundaries

Since 2002, DataPath has helped TPAs break through the barriers of complicated billing administration. Administrators are trying to remain competitive, stay on top of regulatory changes, and attract and maintain new revenue streams. Rise above these challenges and forge a trail to greater success with our best-in-class billing platform featuring Direct and Customized Billing, and Retiree Billing.

"We consider DataPath our partner in business. They provide the technology that allows us to do what we do efficiently so we can focus on customer service."

— Gina Marken, Principal
Sound Benefit Administration

DataPath's best-in-market billing platform was designed to address the complexities of healthcare benefits administration. For over three decades, we've worked hand-in-hand with our clients, developing innovative technology solutions to help them efficiently administer Direct Billing and Retiree Billing programs, and other billing needs tailored specifically for their clients. Plus, we provide industry-leading customer support that delivers superior service whenever you need it.

DataPath's powerful Billing solution has many ease-of-use features, including unlimited plan designs, an intuitive interface, and 24/7 online account access.

Complex billing administration has never been easier.

Direct and Customized Billing

DataPath's Direct Billing can be used to collect premiums for group health benefits or customized for other billing needs such as leave of absence, individual marketplace payments, parking fees, union dues, etc.

Our solution adapts to a variety of specifications, enabling you to handle any payment, benefit, billing, and election structure.

Retiree Billing

For your clients that offer retiree health benefits, plan administrators need a solution that easily manages changes in employment status.

Our versatile Retiree Billing features active-to-retiree auto enrollment, and the ability to adapt to a wide variety of specifications based on the needs of your clients.

DataPath Billing Solutions Features

Integrated Cash Management – Keep track of premium receipt and remittance, issue refunds and create checks for participants.

Third-Party Payer Capability – Accurately invoice an entity other than the named account holder. Receipts can be identified in the system by the actual payer, allowing any subsequent refunds to be made to the actual payer rather than the account holder.

Flexible Importing – Save time on manual processing and data entry. Tell us the data elements and order, choose the file type, and the system imports the specified data.

State-of-the-Art Fulfillment Services – Generate documents and notices automatically, store documents digitally and on the web, and receive proof of mailing.
