

## Surge ahead with DataPath benefits debit cards

### Benefits Debit Cards

Since 2002, DataPath has been helping TPAs offer more attractive benefits plans with account-linked debit cards. Add a card to plans featuring health and dependent care FSAs, HRAs, HSAs, Transit/Commuter accounts, and more. Our all-in-one payment solutions cut down on benefits fraud while enabling TPAs to be competitive and reduce claims processing. Plus, you can increase plan enrollment, promote higher client satisfaction, and give participants instant access to their benefit dollars.

DataPath's proprietary benefits debit cards can link to any account-based employer benefit package and offer a stacked benefit environment that allows multiple plans on a single payment solution. Through the Summit portal, TPAs can setup plan order logic so that the cards know which account to choose from when participants use their benefits.

Our benefits debit cards use DataPath's completely integrated, single-vendor platform for card issuance and authorization logic. We are an end-to-end card processor, and every related function stays in house, including market-leading customer service and technical support.

### Benefits for TPAs

- Create, issue, and administer debit cards
- Customize the card with your logo and brand
- Increase auto-substantiation rates
- Boost life count through increased participation within existing groups
- Prevent benefit fraud with an MCC-restricted and IAS-integrated debit card

### Benefits for Employers

- Increase participation in group plans
- Increase employee contributions to tax-advantaged accounts and associated employer FICA savings
- Give employees instant access to plan dollars

### Benefits for Employees

- Get instant reimbursement for goods and services at the point of sale
- Reduce the need to submit paper claims for expenses
- View balances, upload receipts, and submit claims via mobile app
