

Summit COBRA

For two decades, DataPath has been helping administrators rise above their competition with best-in-class COBRA and Premium Billing solutions.

-  **Integrated with CDH Accounts**
Offer multiple lines of service, including FSA, HRA, HSAs, MERP, and Premium Billing in a single solution.
-  **Simplified Terminations**
Summit allows TPAs to enter and manage qualified termination events from a single screen – simplifying terminations for multiple LOS and updating all participant records with just a few clicks. Qualifying events can also be entered by employers or via a Premium Billing import file.
-  **Automated Compliance**
Stay in compliance with time frame tracking notifications and automated notices and communications. The default date is automatically merged into merge fields when a qualifying event occurs.
-  **Custom Billing Administration**
Manage a variety of custom billing needs. Collect premiums for retiree and group health benefits, leave of absence, individual marketplace payments, parking fees, union dues, and more.
-  **Action Item Alerts**
Summit generates messages to TPA users including pending approvals, coverage elections, and participant-entered receipts.
-  **Flexible Payment Options**
Participants can pay their premiums with credit card, check, ACH, mobile app payments, or third party payments. They also have the option to schedule ACH payments in advance.
-  **Fulfillment Services**
DataPath offers affordable rates for fulfillment services. Generate documents and notices automatically, store documents digitally and on the web, and more.
-  **COBRA BPO Services**
Stay in compliance with our COBRA BPO services. Let us handle importing employer and beneficiary data, elections, event and payment processing, new hire notices, qualifying events, takeovers, and more.
-  **Convenient Mobile App**
The Summit mobile app allows participants to see coverages and make premium payments from their mobile device.
