

Where do you want to *grow*?

DataPath COMPASS Card

Debit Card Support for Custom Benefit Programs Compliance

DataPath® 

DataPath's COMPASS™ gets TPAs where they want to grow with a highly customizable debit card that can support almost any benefits program.

In today's rapidly diversifying benefits market, TPAs need the ability to adapt and innovate without boundaries. Backed by DataPath's decade-plus experience in end-to-end card processing, COMPASS helps TPAs address employers' specific needs, parameters, usage restrictions, and supported benefits accounts while delivering a first-class customer experience.

Supports Nearly Any Program Parameters

DataPath COMPASS can be used virtually anywhere in the U.S. Accommodate purchases by setting up desired program requirements and parameters directly in our Summit cloud-based admin platform.

Set Usage Restrictions at the Plan Level

Our Summit platform lets employers and their TPAs restrict debit card usage only to specific merchant types. Set MCC code restrictions within Summit at the employer plan level without need for intervention by our customer support team.

Unlimited Opportunity

The COMPASS card is perfect for such benefit programs as –

- Lifestyle spending accounts
- Employee bonuses and perks
- Qualified disaster relief payments under IRS Section 139
- Miscellaneous employee support programs (gasoline, groceries, heating oil, propane, etc.)
- Medicare Advantage/Medigap/Medicare Supplement programs for active employees or retirees

– and for just about any other programs that TPAs may develop to serve the needs of their employer groups.

Get where you want to grow with the DataPath COMPASS Card!
