## Card Processing Services

What if you could?

### What if you could have a more reliable, robust debit card solution?

If your current vendor isn't meeting your needs or you need a more advanced system, DataPath card processing services are here to help.

For more than a decade, DataPath has been an end-to-end card processor for benefits debit cards linked to tax-advantaged benefits accounts, Medicare set-aside programs, and different types of post-tax accounts.

### All Administrative Systems

Whether you have an in-house system or a commercial admin platform from a vendor whose card processing services have proven less than satisfactory, you can use DataPath's secure and efficient debit card processing services.

### All Plan Types

DataPath card processing services are available for a variety of plan types:

Healthcare and Dependent Care Flexible Spending Accounts (HCFSAs/DCFSAs)

Health Reimbursement Arrangements (HRA)

Health Savings Accounts (HSA)

Commuter/Transit Accounts (Section 132)

Lifestyle Spending Accounts (LSA) and other plans

### Security and Experience

DataPath was one of the founding members of SIGIS. We maintain a well-established, secure gateway to Mastercard®, and card transactions are processed by our experienced, U.S.-based card services team. Multiple vendors and unnecessary data transfers are all eliminated, greatly reducing data security risks.

### Schedule Your Demo Today

DataPath card processing services can also handle stacked benefits and virtually any type of card-based transaction restrictions. The full extent of available processing can be discussed during a customized demo of the system.

Visit [dpath.com/cdh](https://dpath.com/cdh) today to schedule your custom demo.
